What Agriculture Produces

A common view of agriculture is

There is much more on the peripheral...

Agriculture Production Industries

Mechanics, computer technicians, irrigation managers, agronomist, loan officers

Fertilizers, chemicals, machinery and implements, animal feed

Geneticists, crop and animal scientists, biotechnicians, plant breeder

Once produced then what?

Post-Harvest Inputs

Packaging, canning or freezing, slaughtering, combining commodities for customer use

Advertising, product packaging, distribution systems

Food scientists, chemists, commodity researchers

By land, rail, air, and water

Agribusiness
